Topic: HTML Form Exercise

The hardest part about building a form is building your *first* form... your first *workable* form. So, that's what we're going to do first.

Exercise 1:

Make a simple page and put two text inputs and a Submit button into it. Ask for the user's name and address...

Name:
Address:

Exercise 2:

Ask for a few more things... first name, last name, address, city, state, zip. Arrange things neatly in a borderless table so everything lines up and looks nice and neat...

Name:	<input type="text"/>
Address:	<input type="text"/>
City:	<input type="text"/>
State:	<input type="text"/>
Zip:	<input type="text"/>
<input type="submit" value="Send Your Order"/>	

Exercise 3:

Lastly, make the Name, Address and City boxes a little bigger and add a text area for Additional Comments...

Name:

Address:

City:

State:

Zip:

Magazine:

Subscription: ☒ 1 year ☐ 2 years

Additional Comments:

Exercise 4: Try to create the following form.
